

Solution Architecture

Date	14 October 2022
Team ID	PNT2022TMID22967
Project Name	University Admit Eligibility Predictor
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Quickly find the most effective technological solution for existing business problems.
- Explain to project teams the structure, traits, behaviour, and other features of the software.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.
